

TURKMENISTAN BLOCK 1 GAS DEVELOPMENT PROJECT

Client : MITCO/ Petronas Carigali Sdn Bhd

Location : Caspian Sea

Wasco Energy's Pipe Coating Division has been awarded a contract to provide pipeline coatings for the MITCO/PCSB Turkmenistan Block 1 Gas Development Project. This project entails coating a 15.1km x 12" diameter pipeline with a syntactic polyurethane (SPU) insulation coating at an average thickness of 84mm. Coating is scheduled to start in October 2008 at Wasco's coatings plant in Kuantan, Malaysia.

Sacrificial aluminium anodes will be supplied by Wasco Energy subsidiary, MPE Lindung Sdn Bhd, which is the only anode foundry in Asia Pacific to be qualified to Shell's DEP 37.81.20.31-EPP for the manufacture of cold water anodes for deepwater projects.

The Wasco Energy Pipe Coating Division specializes in pipe coating and corrosion protection services. The company operates coating plants in Malaysia, China, Saudi Arabia and Nigeria.

Wasco Energy Ltd. is an energy services company, headquartered in Malaysia, offering a wide spectrum of oil and gas products and services, such as:

- Pipe coating and corrosion protection
- Pipe manufacturing
- Process equipment engineering and fabrication
